

Oxypod™ can make a massive difference to people's well being in their homes by improving the warmth of radiators whilst reducing energy bills

Oxypod™ – In the news

- "Oxypod™ is a quick and easy way to substantially reduce bills no matter how much the energy companies increase the prices, Oxypod™ represents tremendous value for money" - Caring UK
- "By installing Oxypod™ turning down your thermostat becomes the norm and you gain extra warmth in your rooms! Oxypod™ removes the dissolve air that forms an insulation on the inside of your pipes and radiators. LOWER BILLS BUT GREATER COMFORT" - Which?

...read what Oxypod™ customers say

"Boiler turned down within one hour of Oxypod™ Install" - Mr A Acton, Stafford

"What I found was unbelievable within half an hour all 7 radiators had reached target temperature. I can't believe how well this product works and I will be recommending Oxypod™ to all my customers from this day forth." - Hennessey Build on behalf of Royal Borough of Greenwich.

"Pleasingly our heating bills have reduced as estimated" - Mr & Mrs Zywicki of Menston, West Yorkshire.

"I have just got my energy statement and it is reduced massively." - Retired Mechanical Engineer of Selby, Yorkshire.

"Very Pleased to report that 5 weeks after installing an Oxypod™ device, gas consumption for central heating is down by 27%" - David Masterton.

"The whole place feels warmer and cosier" - Private Care Home in Aberdeen

Resulting from a 16-year labour of love and a late, near-accidental design change, the so-called Oxypod™ received a top prize in 2015's International Innovation & Research Awards, organised by the Chartered Institute of building.
