Why choose Marshalls?

As the UK's leading hard landscaping manufacturer, Marshalls has been creating better spaces since the 1800s. Over this time, it has become synonymous with quality and excellence. Which is why it has been chosen for prestigious landmarks such as Trafalgar Square.

Marshalls

by Marshalls

Indian sandstone has become popular in the UK in recent years, and at its best its reputation for strength and beauty is justified. However, not all natural stone is equal, and many of the cheaper sandstones available in the UK are soft and porous, making them weak and prone to algae, lichen growth or to cracking and unable to withstand our harsh British frosts.

All Marshalls sandstone however, is tested and has exceeded the British Standard. The Marshalls Stone Standard sets minimum criteria to which ALL our stone performs.

Marshalls sandstones have low water absorption and high flexural strength that can deliver our promise to be completely frost resistant.* Any sandstone that does not meet the Marshalls Stone Standard may not be fit for purpose. So don't take a chance by choosing or installing an inferior product that won't stand the test of time, and our British weather.

*All Marshalls natural stone is CE marked and tested in accordance with BS EN 1341. Declarations of Performance are available at www.marshalls.co.uk/DOP

Laying down the standard

The Marshall's Register has been in existence for over 15 years, and is the UK's only fully vetted, nationally accredited landscape contractor scheme. It was created to ensure that all customers buying Marshall's products enjoy peace of mind, together with a guaranteed high quality end result.

Although not employed by Marshall's, each of these independent installers agrees to abide by our rigorous installation guidelines. They are all regularly assessed by our network of regional assessors in order to ensure standards are maintained at optimum levels.

After all your planning, investment and time, finding the right installer is essential, as you will rely on their advice, product knowledge and workmanship to achieve the desired end result.

Only Marshall's Register members can provide the Marshall's Hard Landscape Guarantee, providing a 10 year guarantee on product and 5 years on workmanship.

To find your local Register member please visit www.marshall's.co.uk/findaninstaller

The most frequently asked question for any hard landscaping project is always 'How much will it cost?'

The majority of installation costs are usually incurred for ground preparation and labour, so it's worth noting that opting for a premium quality paving won't significantly increase the overall cost. Choose the best you can afford!

A guide product price band is shown on each page

£££	££	£
PREMIUM	MID RANGE	STANDARD

Our installers can and do provide great advice on how to turn your existing space into something special...

...here's what some of you said about their results:

'Our experience was nothing short of 100% satisfaction... we now have the garden that we have always dreamed of having.' - **K Wynne, Peebles**

'I am delighted with the result and keep having compliments from passers by.' - **S Hodges, Blackheath**

'Our driveway looks great and I couldn't be happier. It comes down to good quality materials and installer.' - **C Lumsden, Motherwell**

'They worked with me on the design, provided expert and informed guidance, and delivered above expectations.' - **G Masterson, Renfrewshire**

With comments like this it is no wonder that 99% of all customers who have used a Register member would recommend them to a friend*

It's never been easier to get your dream patio or driveway

Creating your new driveway or patio is an exciting prospect, but we understand that it can also be a bit daunting, especially if you're not sure where to start. That's why we make it as easy as possible by supporting you at every stage of your project – from initial conception, to completion and beyond with our 10-year guarantee.*

To get the ball rolling, decide when you want the work to start. It's very important to plan ahead, as the best installers will be in demand and need a good bit of notice. Beware of installers who can start immediately – there's often a good reason why they're not booked up.

Step 1

Find your style

This brochure is a great place to start; our products are grouped into different styles so you can choose the one that best suits your taste.

To find your style, turn to pages 14 -15 for paving or 112-113 for driveways

Step 2

Speak to an Installer

They will manage your project from start to finish, providing advice on design, features, products and drainage.

Obtain more than one quote, ensure they quote on the same scope of works, and ask to see their most recent Marshalls assessment.

To find your local accredited installer, please visit marshalls.co.uk/installers

Step 3

Choose your products

Marshalls uses only the finest products in a great range of colours, textures and styles.

Your installer will work with you to select the best products for your project

Step 4

Book your project

The best installers get booked up quickly, so book in good time – especially around the busy summer months. Choose the installer who best understands your requirements. Cheapest is not always best. Remember to ask for your Marshalls Hard Landscape Guarantee*

Marshalls recommends you book your project at least three months in advance

Step 5

Enjoy

Sit back and relax, safe in the knowledge that your fantastic new project is guaranteed for 10 years, should anything go wrong.*

*Marshalls Hard Landscape Guarantee is purchased separately and only available through your Accredited Marshalls Register Installer.

Paving solutions

Selecting the right paving products to create the desired effect should not be the only consideration when planning your garden landscaping project. What lies beneath your patio is as important as the finished layer.

So why is the sub-base so important?

Think about your house itself. It must be built on sound foundations to last, and the same is true for your patio. In order to ensure that the finished project will retain its long-lasting good looks, the appropriate sub-base must be installed correctly.

'The sub-base is typically a layer of compacted stone aggregate, laid on the subgrade (earth) that will support the paving products you have chosen to install. It is the main load bearing layer for your patio or hard landscaping, and its role is to spread this load and support the products evenly over the subgrade.

Illustrated here is a typical example of how your sub-base will be made up. The actual products and depths selected will change dependent upon the products you have selected for installation. The products are installed on a good quality full mortar bed, or sand where the installation instructions allow.

Details of each sub-base type can be obtained from the Technical Advisory Team on 0370 411 2233 or visit our website www.marshalls.co.uk

Incorrect sub-base installation: the potential pitfalls

Where the sub-base is installed wrongly or is insufficient to support the chosen paving products, the consequences are significant.

Spot bedding giving poor support

Poor bedding layer

Spot bed pulled through the product

Choose a Marshalls Register Installer

Marshalls Register members are assessed on a regular basis to ensure they install our products correctly, giving you your dream patio which will enhance your property into the future. That's why 99% of people who use a Register member would recommend them to a friend.*

To find your local member please visit www.marshalls.co.uk/findaninstaller

*Data analysis from Customer Feedback Forms, includes the period up to and including September 2016.

Find your style

Whether you're looking for a classic style or something more modern for your garden, our selection of premium paving products will leave you with a beautiful space you just can't help but spend time in. To help you find the look that suits you best, we've arranged our offering into different categories.

BORDERS & EDGINGS

Decorative edging is a practical and attractive detail in any garden

Main image: HEWNSTONE EDGING, Dark Buff (DB), FIREDSTONE Paving, Fired York (FY)

Edgings are a neat physical barrier between paths and patios and surrounding soft landscaping. Edgings, when haunched correctly also help to maintain the integrity and strength of the paving they border, indeed carefully chosen edgings can be important elements in the design and maintenance of a garden.

Paving & Walling Notes

Common to all Marshalls Natural Stone:

- Marshalls endeavour to ensure that all natural stone products are covered by the Fairstone Guarantee. If the Fairstone Logo is visible on a product page be assured that this product is processed and supplied only by proven ethical sources (see page 5 for more information)
- All Marshalls Sandstone paving is covered by the Marshalls Stone Standard quality mark of assurance. Where the Marshalls Stone Standard logo is visible on a sandstone page, be assured that this product not only meets but exceeds the base technical levels outlined in the British Standard
- The natural origin of stone means variation in colour, texture and natural markings is inevitable. Marshalls strive through expert hand selection to ensure the integrity of each natural stone range, however as in all natural products some variation may occur
- Natural Stone products come with specific installation guidelines. Please contact our Technical Advisory Team on 0370411 2233 or visit our website www.marshalls.co.uk prior to installation
- Please note granite and marble is not suitable for use with WeatherPoint

p22	SAWN VERSURO
-----	--------------

- A lightly textured natural stone product with good slip resistance
- Remember if used indoors this paving should be sealed with a proprietary water based acrylic sealant
- When using Jumbo and King Size, due to the weight of the units mechanically aided lifting is essential
- Please note Jumbo and King Size can only be delivered direct to site
- This paving is ideal for jointing with Marshalls all weather, 'WeatherPoint Jointing Compound'

p24	FLAMED NARIAS
-----	---------------

- A lightly flamed natural stone product
- This paving can be purchased in less than full packs through Marshalls Order Select process
- This paving is ideal for jointing with Marshalls all weather, 'WeatherPoint Jointing Compound'

p36, 38, 40, 58	SYMPHONY VITRIFIED
-----------------	--------------------

- Vitrified paving is a high performance, manufactured paving product
- For perfect results these products require appropriate cutting tools and correct installation techniques. Consult a Marshalls Register installer or contact our Technical Advisory Service on 0370 411 2233

p42	ARGENT
-----	--------

- An attractive, hardwearing concrete paving product with granite aggregates
- For a contemporary look choose Argent Smooth, for greater slip skid properties try Argent Textured
- This paving is ideal for jointing with Marshalls all weather, 'WeatherPoint Jointing Compound'

p45	MARSHALLS STEPS
-----	-----------------

- Marshalls has a broad range of high performance natural stone steps, ranging from sandstone to marble and granite
- They can be used the match Marshalls natural stone paving products or to complement concrete paving products

p50	SCOUTMOOR
-----	-----------

- A natural stone paving product
- This product is supplied 'direct to site' only
- It is recommended that you contact Marshalls Technical Advisory Service for best installation advice when laying this paving
- A mortar joint or Instarmac FloPoint should be used with this product

p52	RIVEN HARENA
-----	--------------

- A natural stone paving product
- This paving is carefully calibrated to a consistent thickness to ensure speed and precision of installation
- Remember Harena Circles are available and stone is hand selected to ensure compatibility across your patio
- This paving is ideal for jointing with Marshalls all weather, 'WeatherPoint Jointing Compound'

p68	FIRESTONE
-----	-----------

- An accurate riven stone replica, concrete paving product
- This paving is ideal for jointing with Marshalls all weather, 'WeatherPoint Jointing Compound'

p70	SAXON
-----	-------

- Saxon is a textured concrete paving product, made with local aggregates giving excellent slip skid qualities
- Please note Saxon is made in a number of factories across the UK and uses local aggregates. So it is not recommended to lay product from a number of factories together
- This paving is ideal for jointing with Marshalls all weather, 'WeatherPoint Jointing Compound'

p72	PERFECTA
-----	----------

- A concrete paving product with Yorkstone aggregates, which are ground to give the appearance of terrazzo
- Yorkstone aggregates, give this product excellent non-slip properties, even when wet
- This paving is ideal for jointing with Marshalls all weather, 'WeatherPoint Jointing Compound'

p73	REGENT
-----	--------

- A standard riven stone replica, concrete paving product
- This paving is ideal for jointing with Marshalls all weather, 'WeatherPoint Jointing Compound'

p74	INDIAN SANDSTONE
-----	------------------

- A budget natural stone product
- This paving is comparative with most other commercially available stone but has not met the rigorous grading standards set for all our premium grade Harena sandstone
- This paving is ideal for jointing with Marshalls all weather, 'WeatherPoint Jointing Compound'

p75	LEYBURN
-----	---------

- A budget concrete paving product
- Although performance is good, sizes and colours will be limited
- This paving is ideal for jointing with Marshalls all weather, 'WeatherPoint Jointing Compound'

Common to all Marshalls Walling Products:

- Marshalls recommends the use of Coping and Caps with all Walling Products. Copings and Caps protect walls against the staining effect of rain for a period of time

p90	STONEFACE DRYSTACK VENEER
-----	---------------------------

- A natural stone veneer for transforming existing or purpose built walls
- Panels are in a Z cut format to hide joints, for a seamless finish
- This product is supplied with the correct amount of adhesive and primer

p91	STONEFACE SAWN VENEER
-----	-----------------------

- A natural stone veneer for transforming existing or purpose built walls
- This product is supplied with the correct amount of adhesive and primer

p92	ARGENT Walling
-----	----------------

- A textured concrete walling product with sparkling aggregates in the surface
- Corner Quoin Ends can be ordered via Marshalls Order Select
- Please note this walling is only faced on one side
- Use Marshalls 'M-Fix Walling Adhesive' when using this product

p93	WILDWOOD Walling
-----	------------------

- An attractive concrete walling product with a premium lightly polished finish
- Corner Quoin Ends can be ordered via Marshalls Order Select
- Please note this walling is only faced on one side
- Use Marshalls 'M-Fix Walling Adhesive' when using this product

p94-95	TRADITIONAL NATURAL STONE Walling
--------	-----------------------------------

- A premium natural stone walling product, available in a number of colours and finishes
- A 10mm joint width is recommended with this product

p96	OLD MILL BRICK
-----	----------------

- A traditional clay walling product
- A 10mm joint width is recommended with this product

p26	CASARTA SLATE
-----	---------------

- A natural slate paving product
- Natural slate inevitably shows variation in colour, so viewing the actual samples is always recommended
- Also dark slate sometimes surface blemishes occur during installation, these will weather in over time,
- If used indoors an appropriate water-based sealant is recommended
- This paving is ideal for jointing with Marshalls all weather, 'WeatherPoint Jointing Compound'

p28	LAZARO MARBLE
-----	---------------

- A marble product which should be Installed on full mortar bed, and jointed with a proprietary waterproof grout
- For perfect installation of this exceptional paving Marshalls recommend specific primers and bonding agent. Your Register Installer should refer to his Pocket Installation Guide or call our Technical Advisory Service on 0370 411 2233
- We recommend the use of slurry primer, or similar flexible bonding agent to increase adhesion, this should be introduced to the back of the flag prior to installing onto the mortar bed
- Ensure cutting is carried out using a power saw with the appropriate quality diamond blade
- Marshalls WeatherPoint is not suitable for use with this product

p29	NATURAL SLATE
-----	---------------

- A natural slate paving product
- Please note natural products will always vary in colour although we aim to show the best representation possible, but colours are best judged by viewing actual samples
- Also dark slate sometimes surface blemishes occur during installation, these will weather in over time,
- This paving is ideal for jointing with Marshalls all weather, 'WeatherPoint Jointing Compound'

p30	GRANITE ECLIPSE
-----	-----------------

- A natural granite paving product
- Please be aware, natural slate inevitably shows variation in colour, colours are best judged by viewing the actual samples
- As Granite Eclipse is a natural material, varying degrees of quartz veining may be apparent in some pieces
- Make sure, if used indoors, paving is sealed with a proprietary water-based acrylic sealant
- Not suitable for use with Marshalls WeatherPoint jointing compound, instead use waterproof external grout

p54	ANTIQUE ALVERNO
-----	-----------------

- A natural stone paving product
- This paving is carefully calibrated to a consistent thickness to ensure speed and precision of installation
- This paving is ideal for jointing with Marshalls all weather, 'WeatherPoint Jointing Compound'

p56	LIMESTONE ALURI
-----	-----------------

- A natural stone paving product
- Please note that Charcoal limestone can lighten depending on weather conditions in your area
- This paving is ideal for jointing with Marshalls all weather, 'WeatherPoint Jointing Compound'

p58	ARRENTO
-----	---------

- Vitrified paving is a high performance, manufactured paving product
- For perfect results Symphony Vitrified products require appropriate cutting tools and correct installation techniques. Consult a Marshalls Register installer or contact our Technical Advisory Service on 0370 411 2233

p60	PAVESYS HERITAGE
-----	------------------

- Pavesys is a unique patented concrete paving system,
- The system is designed to create the correct width, automatic joints when the paving is laid. If you would like to know more about Pavesys or if using it for the first time, it is recommended that installation instructions are obtained from the Technical Advisory Service (Tel: 0370 411 2233)
- Remember Pavesys Heritage comes with the correct amount of Weather Point jointing compound

p62	COACH HOUSE
-----	-------------

- An accurate riven stone replica, concrete paving product
- This paving is ideal for jointing with Marshalls all weather, 'WeatherPoint Jointing Compound'

p63	WOODSTONE DECKING
-----	-------------------

- An accurate wood replica, concrete paving product
- Wood stone are faced on both edges for a realistic look

p63	WOODSTONE SLEEPERS
-----	--------------------

- A wood replica, concrete paving product
- Wood stone are faced on both edges for a realistic look

p64	HERITAGE
-----	----------

- An accurate riven stone replica, concrete paving product
- This paving is ideal for jointing with Marshalls all weather, 'WeatherPoint Jointing Compound'

p76	TEXTURED UTILITY
-----	------------------

- A budget concrete paving product with good non-slip properties
- Although performance is good, sizes and colours will be limited, and finish may be varied
- This paving is ideal for jointing with Marshalls all weather, 'WeatherPoint Jointing Compound'

p77	UTILITY PAVING
-----	----------------

- A budget concrete paving product with a shot blasted or riven finish with good non-slip properties
- Although performance is good, sizes and colours will be limited, and finish may be varied
- This paving is ideal for jointing with Marshalls all weather, 'WeatherPoint Jointing Compound'

p78	WEATHERPOINT 365
-----	------------------

- A non hazardous, weed and frost resistant jointing compound ideal for 8-15mm joints
- Speeds up installation time
- WeatherPoint can be applied in wet or dry weather conditions, but water must be always be used
- No surface staining if applied correctly
- WeatherPoint is not suitable for use on granite paving or marble

p97	TEGULA Walling
-----	----------------

- A traditional concrete walling product which complements a range of Drivesett Tegula and other Marshalls landscaping products
- A 10mm joint width is recommended with this product

p98	MARSHALITE Walling
-----	--------------------

- A traditional concrete walling product which complements a range of Marshalls Paving and Driveway products
- A 10mm joint width is recommended with this product

p99	CROFT STONE
-----	-------------

- An attractive, concrete easy-build walling system
- This walling is Ideal for retaining walls up to 6 courses, but should never be used as a freestanding or dividing wall

p102-103	DECORATIVE AGGREGATES
----------	-----------------------

- Decorative Aggregates are natural products
- Please note because these are naturally occurring materials, they may vary slightly in size and colour, this reflects the product character
- Recommended minimum coverage for aesthetic effect – 25mm, for weed suppression – 50mm
- Decorative Aggregates do not always provide a solid base to walk on, care should be taken

Driveway solutions

Choosing the right products to transform your driveway and enhance the kerb appeal of your property is just part of the planning process for your project. What lies beneath your driveway is just as important as the stones or setts that provide the finishing touch.

It is vital that rainwater run off is managed correctly to ensure a sustainable driveway solution; select a professional qualified to install products correctly and to advise you on how to channel the rainwater which lands on your property – see page 136 for our permeable solutions.

The importance of your driveway sub-base

Think about your house itself. It must be built on sound foundations to last, and the same is true for your driveway. In order to ensure that the finished project will last and retain both its aesthetics and safe, level surface, the appropriate sub-base must be selected and installed correctly.

The sub-base is typically compacted stone aggregate, laid on the subgrade (earth) that will support the paving products you have chosen to install. It is the main load-bearing layer for your driveway and its role is to spread this load and support the products evenly over the subgrade.

Illustrated here is a typical example of how your sub-base will be made up. The actual products and depths selected will change dependent upon the products you have selected for installation.

Remember, the sub-base is integral to structure and performance of the driveway and can often take up to 80% of the total project cost. Therefore, choosing the best possible product will not add significantly to the overall cost.

The potential pitfalls of incorrect sub-base installation:

Where the sub-base is installed incorrectly or is insufficient to support the chosen driveway products, the consequences are significant.

Poor edge restraint

Rutting

Sinking driveway

Choose a Marshalls Register Installer

Marshalls Register members are assessed on a regular basis to ensure they install our products correctly, giving you the right driveway to enhance the appeal of your property into the future. That's why 99% of people who use a Register member would recommend them to a friend.*

DRIVESYS®
RIVEN STONE
Patented Driveway System

Complete The Look
Recommend: Paving p60 Drainage p167 Edging p170

1: DRIVESYS RIVEN STONE, Golden (GO)
2: DRIVESYS RIVEN STONE, Silver Grey (SG)
3: DRIVESYS RIVEN STONE, Basalt (B)

Creating the perfect contemporary driveway

An elegant driveway system replicating lightly riven stone face profiles complemented by crisp, straight contemporary edges, offering an attractive and cost effective alternative to natural stone. Practical, hardwearing colour and finish, created from real stone masters, with co-ordinating roundtop edgings.

To complete every Drivesys driveway, each pack is supplied with the right amount of ready mixed jointing compound, minimising fuss and number of deliveries.

	Sizes mm (nominal)	No. item/ pack	Area (m ² /pack)	Colours
Mixed Size Pack	220 x 160 x 60	50	4.51	GO SG B
	200 x 160 x 60	30		
	180 x 160 x 60	40		
	160 x 160 x 60	10		
	120 x 160 x 60	15		
Ready mixed jointing	15kg	2		GREY
Total/pack		145	4.51	

Please note: Drivesys pack sizes may be subject to change. Please call Marshalls on 0345 3040 707 for more information

Drivesys blocks come with a protective transportation seal which will remain slightly slippery underfoot until weathered. Once dissipated blocks may appear lighter in colour.

PRIORA® PATENTED PERMEABLE PAVING SYSTEMS

Global population growth, continued urban expansion and the effects of climate change are all impacting upon our environment. In this country, recent severe weather events have highlighted the incidence of flooding, where our drains simply cannot cope with the amount of rainfall run off – a problem which is only likely to increase into the future.

This increased risk of flooding has led to changes in legislation, meaning that the environmental consequences of creating hard landscaped areas for vehicle parking must now be taken into consideration when planning your driveway project. Visit www.communities.gov.uk for further information.

However, new and replacement driveways of any size are exempt from planning permission requirements where they use Sustainable Urban Drainage Systems (SuDS).

Marshalls offers a full range of driveway products requiring no planning permission and having a positive impact on the environment.

The Piora Sustainable Urban Drainage System (SuDS) has been specifically designed to manage heavy rainfall events. Each 60mm block features the Marshalls patented Piora nib design, which allows surface water to pass between the blocks into a specially calculated sub-base without compromising the structural performance of the driveway.

Three of the Marshalls most popular driveway ranges offer Piora SuDS options; Drivesett Argent Piora (p140), Drivesett Tegula Piora (p142) and Driveline Piora (p.144).

Marshalls permeable grids such as Grassguard or Drivegrid can also be used to create occasional parking areas capable of managing the rainfall that lands on your property as long as a permeable sub-base is installed. Grassguard works in a similar way to Piora block paving, retaining all the environmental benefits of natural grassed areas yet offering the versatility and hardwearing strength of concrete. Drivegrid is a premium gravel stabiliser which combines with a permeable geotextile and choice of aggregate to complement any style of property. Both have been designed to allow rainwater to flow through easily into the sub base below.*

In the sub-base, the sand laying course and MOT Type 1 are replaced with a larger aggregate that creates voids to allow the water to drain through. This design stores water safely until it can be absorbed into the ground, instead of directing it to the local drainage system, where it could present a burden.

*Please note Marshalls Drivegrid and Grassguard products work differently by holding a smaller volume of water, whilst allowing continued use. Contact Marshalls Technical and Advisory Service for more information.

Where a permeable driveway is not an option

Adequate drainage must be incorporated into your driveway or patio design. Marshalls has launched Driveline Drain, an innovative linear drainage solution that successfully achieves a premium finish, reduces the risk of flooding and complies with government legislation. See Page 167 for more details.

For more product notes see p172-175 or website

Driveway Notes

General Driveway Notes

- All Marshalls driveway products in this brochure are designed for domestic vehicles only, they are not designed for commercial vehicles
- Driveways must be installed with edge restraints for stability
- Driveways must be installed in accordance with current legislation to manage and control water run-off

Natural Stone Driveway Products

- Marshalls endeavour to ensure that all natural stone products are covered by the Fairstone Guarantee. If the Fairstone Logo is visible on a product page be assured that this product is processed and supplied only by proven ethical sources (see page 5 for more information)
- All Marshalls sandstone paving is covered by the Marshalls Stone Standard quality mark of assurance. Where the Marshalls Stone Standard logo is visible on a sandstone page, be assured that this product not only meets but exceeds the base technical levels outlined in the British Standard
- Due to the nature of this product, you may see some colour variation in natural stone products

Marshalls Concrete Driveway Products

- When laying block paving products, for an even colour blend ensure blocks are taken from a number of packs. Also taking blocks from vertical rather than horizontal layers will ensure good colour blend
- Marshalls concrete block paving is manufactured in different factories. Colour may vary slightly across these works of manufacture
- Marshalls can supply kiln dried sand, contact your local service centre for more information

For specific Installation Guides or if you are laying any Marshalls Driveway materials for the first time, please contact Marshalls Technical Advisory Team on 0370 411 2233 or visit our website www.marshalls.co.uk for installation advice.

p127 CROPPED GRANITE SETTS

- Natural granite cubes, ideal for pathways, driveway entrance strips or borders
- This product can be used for driveways, but Marshalls Installation Guidelines must be carefully followed
- Please note Marshalls WeatherPoint is not suitable for use with this product

p128 DRIVESETT ARGENT

- A textured, concrete driveway product with attractive exposed granite aggregates
- This product co-ordinated perfectly with Drivesett Argent Edgings, see p170, Argent Paving p42 and Argent Walling p92

p130 DRIVESETT SAVANNA

- A smooth concrete driveway product

p132 DRIVELINE METRO

- A textured, concrete driveway product with attractive exposed granite aggregates
- Driveline Metro can be a single colour driveway, or you can purchase a number of different colour packs to create a unique effect

p146 GRASSGUARD

- A permeable concrete grid, driveway system
- Ideal for occasional car parking spaces, but due to its nature it is not as even as other concrete block paving products, so extra care must be taken when walking over areas in high heels
- Manages rainfall run off in a sustainable way and does not require planning permission when installed correctly
- The Grassguard grid allows grass to grow through the blocks, providing a green option for parking

p147 NEW DRIVEGRID

- A composite permeable grid system, which is filled with gravel to create a car parking area or pathway
- When using this product it is essential that the area is framed with an edge restraint for stability
- For best aesthetic looks Marshalls recommends using a driveway entrance strip
- All components available as a system, delivered direct to site

p118, 120, 122 DRIVESYS RIVEN, SPLIT & FLAMED STONE

- A premium, concrete driveway product which has a patented base design to automatically create the right size joint
- Drivesys is available in a number of sizes, colours and finishes
- Sufficient and appropriate jointing compound is delivered with every order
- Drivesys blocks come with a shiny protective transportation seal which quickly wears off to reveal the slightly lighter true colour
- Drivesys Jointing Compound is guaranteed for a period of 12 months or 2 years if the customer has purchased a Marshalls Register Hard Landscaping Guarantee
- It is essential that the 'Drivesys Installation Guide' is followed, to order a copy call the Marshalls Technical Advisory Service
- It is recommended that Drivesys is installed by a Marshalls Register member
- For coordinating Drivesys Roundtop Edging see p170
- Marshalls recommends that Drivesys Jointing Compound is always used with this product for structural stability

p124 MAGNASETT

- A blended mix of premium stone
- Please note due to the nature of this product significant variation between stones can occur
- The use of the correct installation method is critical for this product, please contact Marshalls Technical Advisory Service for more information

p126 NATURAL STONE DRIVEWAY SETTS

- A premium stone driveway product
- Please note due to the nature of this product significant variation between stones can occur
- For a co-ordinated natural stone look try Natural Stone Walling, p88, p94. Stone Steps p44
- The use of the correct installation method is critical for this product, please contact Marshalls Technical Advisory Service for more information
- For paths and edging smaller quantities can be ordered via the Order Select service, see p178

p127 NEW SAWN GRANITE SETTS

- A contemporary, linear natural stone driveway product
- Please note due to the nature of this product significant variation between stones can occur
- The use of the correct installation method is critical for this product, please contact Marshalls Technical Advisory Service for more information
- Please note Marshalls WeatherPoint is not suitable for use with this product

p134 DRIVELINE 50

- A facemix driveway product with a smooth surface

Common to all Priora Driveways:

- The Priora design drains water away safely in heavy rainfall without burdening the community drainage system
- If installed with the correct sub-base this permeable paving solution can be used in a front garden without obtaining planning permission
- Specific installation guidance must be followed
- The Priora System should not be attempted by the DIY enthusiast or untrained installer. It requires the careful calculation of a soil permeability test and appropriate use of specially graded sub-base aggregates.** Should an installer wish to undertake training for the installation of this product please call the Marshalls Helpline on 0345 820 5000 for further information.

Visit the Marshalls website to find your nearest Marshalls Register Installers trained to install Priora Systems, or call 0345 820 5000

p140 DRIVESETT ARGENT PRIORA

- An attractive, yet sustainable concrete driveway product with attractive exposed granite aggregates
- This product co-ordinates perfectly with Drivesett Argent Edgings, see p170, Argent Paving p42 and Argent Walling p92

p142 DRIVESETT TEGULA PRIORA

- A sustainable concrete driveway product, with a traditional look

p144 DRIVELINE PRIORA

- A sustainable concrete driveway product, available in a broad variety of colours

p152 NATURAL STONE DRIVEWAY SETTS

- A premium stone driveway product
- Please note due to the nature of this product significant variation between stones can occur
- For a co-ordinated natural stone look try Natural Stone Walling, p88, p94. Stone Steps p44
- The use of the correct installation method is critical for this product, please contact Marshalls Technical Advisory Service on 0370 411 2233 for more information
- For paths and edging smaller quantities can be ordered via the Order Select service, see p178

p154, 156 DRIVESYS ORIGINAL COBBLE & CLASSIC PAVER

- A premium, concrete driveway product which has a patented base design to automatically create the right size joint
- Drivesys is available in a number of sizes, colours and finishes
- Sufficient and appropriate jointing compound is delivered with every order
- Drivesys blocks come with a shiny protective transportation seal which quickly wears off to reveal the slightly lighter true colour
- Drivesys Jointing Compound is guaranteed for a period of 12 months or 2 years if the customer has purchased a Marshall's Register Hard Landscaping Guarantee
- It is essential that the 'Drivesys Installation Guide' is followed, to order a copy call the Marshalls Technical Advisory Service,
- It is recommended that Drivesys is installed by a Marshalls Register Member
- For coordinating Drivesys Roundtop Edging see p170
- Marshalls recommends that Drivesys Jointing Compound is always used with this product for structural stability

p160 DRIVESETT TEGULA

- A traditional look, concrete driveway product, perhaps Britain's preferred choice of driveway for the past decade and still a perfect option
- Why not try co-ordinating walling and edging see pages 97 & 169

p162 DRIVESETT DUO

- A unique traditional look, concrete driveway product,
- Each block is reversible, which a defined colour blend on each side, allowing individual design mixtures.

p163 DRIVESETT DECO

- A smaller traditional look, concrete driveway product, ideal for driveways
- This product can also be used for pathways, driveway entrance strips or borders

p164 DRIVESETT NATRALE

- A riven textured, concrete driveway product available in a number of sizes

p165 DRIVELINE ELISE

- A distinctive, concrete driveway products with a hammered granite texture

p166 STANDARD BLOCK PAVING

- A standard block paving product, made in different factories in England, Scotland and Wales therefore variations in colour and tone may occur

p167 NEW DRIVELINE DRAIN

- Driveline Drain concrete linear drainage controls normal water run off from driveways and paving with no requirement for planning permission
- Available from Q2 2017
- Accessories are also available for a complete installation,
- Specific installation guidance must be followed. Consult a Marshalls Register Installer. Or for further guidance contact Marshalls Technical Advisory Service

p168-169 KEYKERB, TEGULA & DRIVESETT KERB

- Large or small kerb is the foundation of any successful driveway installation
- Specific installation guidance must be followed. Consult a Marshalls Register Installer. Or for further guidance contact Marshalls Technical Advisory Service

p170 DRIVEWAY EDGINGS

- Perfect edge restraints for driveways, either smooth, round top in Basalt colour, ideal for the Drivesys range or granite looking textured units in Grey or Buff for any other Marshalls Driveway
- Specific installation guidance must be followed. Consult a Marshalls Register Installer. Or for further guidance contact Marshalls Technical Advisory Service

CONDITIONS REQUIRED FOR PRIORA

The grade of Piora featured in this brochure is only intended for normal domestic vehicles and pedestrian traffic, though occasional delivery vehicles over 3.5 tonnes gross weight can be tolerated.*

The Domestic Piora System is only intended for driveways or paths where infiltration is required only in the immediate Piora paved area and not from other surrounding paved or roofed areas (see rainwater catchment area guideline opposite).

In some parts of the country there are ground conditions where infiltration could adversely affect foundations to houses, therefore, if in doubt seek advice from a specialist or the local authority building control department.

Properties constructed pre 1920 may not have been built on traditional concrete foundation, therefore in this case, Marshalls Domestic Piora System should not be installed.

Check for services, Piora must not be installed if gas or electric services run through intended Piora areas.

Piora is a trademark of UNI-International Bausysteme GmbH

GUIDELINES FOR INSTALLING PRIORA

Surface Gradient

The intended Piora area must fall away from the owner's house and any other buildings in the immediate vicinity.

If the driveway exceeds 20m in length and/or has a gradient greater than 1 in 100 then please contact Marshalls Technical Advisory Service.*

The top surface of the driveway should finish at least 150mm below any adjoining wall DPC level.

Existing Foundations

If your house lies adjacent to or less than 600mm from the proposed Domestic Piora driveway area, establish depth of house foundation before undertaking any soil test/Piora installation. The house foundation top surface must be 600mm (minimum) below the finished level of the top of the proposed Piora driveway.

Soil Strength and Permeability

Marshalls Domestic Piora System must be laid on a subgrade which has previously had an established and adequate existing driveway and an area which has a subgrade soil strength greater than 5%.

The Domestic Piora System is only suitable for soil areas where infiltration applies and the test criteria have been met as per the standard permeability test.

For the standard permeability a test hole should be dug for every 20m² of driveway. There should be a minimum of two holes. Holes/pits should be spaced evenly in relation to the proposed Piora area.*

Discharge onto Roadway

The Domestic Piora area must not discharge onto surrounding public roadway and pathways and towards any buildings.

Rainwater Catchment Area

No adjoining surface areas (rainwater pipes, roof areas, etc) must drain onto and into the proposed Domestic Piora driveway area, however, small areas such as door steps and garage areas are acceptable providing they do not exceed 5% of the driveway area.

Guideline: Catchment area** = driveway area
**Catchment area = drained surface area

Aggregates

Piora must be laid with 20mm and 6mm clean crushed stone aggregate to BS EN13242 and BS EN12620 to ensure compliance.

Properties	BS EN13242 & 12620 Specification
Grading	
Fines content	f _k
Shape	Fl ₂₀
Resistance to fragmentation	LA ₃₀
Durability	
- Water abs to BS EN1097-6: 2000, Clause 7	WA ₂₄ 2
- For WA≥2%, magnesium sulphate soundness	MS ₁₈
Resistance to wear	M ₁₀₀ 20
Acid-soluble sulphate content	AS ₀₂
Total sulphur	≥ = 1% by mass

*Should you require a more detailed discussion on the intended use of the area, advice is available from the Technical Advisory Service on 0370 441 2233.

Trees

When installing in close proximity to existing trees, tree roots smaller than 25mm diameter may be pruned back, preferably to a side branch, using a suitable pair of secateurs or hand saw. Roots larger than 25mm should only be severed following consultation with an arboriculturist, as they may be essential to the tree's health and stability. Protection of the pavement will also be required, hence the requirement of a permeable root barrier system such as the Geoweb bio barrier system (www.Fiberweb.com) or similar which is non surface protruding, and therefore, does not present a trip hazard once installed.

Health and Safety

It is possible that more excavation for a Piora driveway may be required than that of a driveway constructed of traditional block paving, therefore, care must be taken when excavating ground to a deeper level. Particular care must be taken to protect the sites from children and partially sighted persons and for collapse of adjoining features such as boundary walls/fences.

Check for services, if they run through intended Piora areas, the service provider must be consulted before work commences.

Care must be taken when constructing over sewer, rainwater pipes and water pipes to ensure that the services remain supported for their full length by undisturbed material and are surrounded on the remaining sides by a minimum of 150mm of 6mm material to protect the service.

Marshalls

Tile and Stone Interiors

DID YOU KNOW MARSHALLS ALSO
SUPPLY INTERIOR WALL & FLOOR TILES?

Why not see our full range of interior Porcelain, Natural Stone,
and Mosaic tiles at www.marshalls.co.uk/tile-and-stone or call
0345 308 3030 for a copy of our latest brochure.

Important General Technical Information

Efflorescence

All concrete products may, in their early life, appear to lose some intensity of colour and experience a milky-white stain on the face of the product. This is efflorescence staining. It is a temporary phenomenon and is in no way detrimental to the performance of the material and responsibility cannot be accepted for its occurrence. Clay products may also suffer from a temporary white stain called efflorescence. This is quite different from efflorescence in concrete products and is caused by soluble salts within the clay being transported by water to the surface as they dry out. Responsibility cannot be accepted for its occurrence. For further information on efflorescence staining in both clay and concrete products, please call the Technical Advisory Service Tel: 0370 411 2233.

Other Weathering

Weathering and site conditions can occasionally cause other variations in shade to appear. Differential weathering can cause patchy dark discolourations on the surface of individual units. Again this will generally diminish over time and will not affect long term performance. Natural stone may develop added marking, deposits or patches as mineral content oxidises. All products can develop algae and organic growths under certain environmental conditions and may require cleaning. Areas adjacent to borders, plant pots and trees may discolour from transfer of plant-life; specialist maintenance advice may need to be sought.

Marshalls cannot accept responsibility for any of the above conditions.

Maintenance

Paving materials require periodic cleaning to maintain their appearance. Regular sweeping to prevent the build-up of detritus is recommended.

Light coloured blocks, whilst structurally sound for driveway use, do emphasise tyre marks and oil spills on the driveway. It must be accepted that these products will need more maintenance if the overall appearance is to be maintained.

Proprietary cleaning agents are widely available. However care should be taken when buying cleaning agents as some varieties contain a concentration of acid, which can adversely affect the appearance of concrete products, clay and natural stone.

A trial on a small section of paving is always recommended prior to using on the full area.

For general cleaning of dirt and algae, vigorous brushing with a stiff yard broom with plenty of hot detergent solution (washing up liquid or non-

bio washing powder), thoroughly rinsed with clean water should suffice. Repeated treatment may be required for paved areas sited beneath trees or in permanent/near permanent shade. In certain circumstances, prolonged contact with wet leaves can result in staining of the paved area. Such contact should be avoided wherever practical.

Power-washing

Power-washing with high-pressure equipment is not normally required. Should these methods be employed, the following precautions should be observed:

- i. Paving should be thoroughly swept to remove detritus (loose debris) that could act as an abrasive agent when moved by the force of a power jet.
- ii. A trial area should be tested before larger scale power-washing takes place.
- iii. No more than a medium pressure should be applied when washing paving.
- iv. The power-washing lance should be held at an oblique angle to the paving and at least 200mm (8") from the surface.
- v. If excess sand is washed from the joints during the washing exercise, it is important that the joints are re-sanded with similar materials upon completion.
- vi. If mortar joints between pavings are damaged during power-washing they should be re-pointed/made good with fresh pointing as required, to maintain the integrity of the paving.

Weatherpoint 365 Terms & Conditions

For full terms and conditions please visit Marshalls website at: www.marshalls.co.uk/weatherpoint

Suitability/Application

The paving flags illustrated in this literature are primarily intended for domestic/landscape use only.

Paving flags suitable for areas subject to intense foot traffic, i.e. pedestrian precincts and commercial applications, etc. are detailed in separate literature. This literature is available on request by telephoning: 0370 411 2233.

For areas subject to vehicular overrun (driveways, parking areas, etc.), block paving products are recommended, (see pages 118-166). The block paving products illustrated in this literature are intended for pedestrian and light vehicular overrun applications (driveways and similar).

For pavements subject to frequent overrun of heavy vehicles, block paving from our commercial/specification range should be used. These are detailed in separate literature, copies of which are available on request by telephoning: 0370 411 2233. Should customers be in doubt as to the suitability of any Marshalls product for a given application, please obtain guidance from our Technical Advisory Service Tel: 0370 411 2233.

Colour Variation

The colours shown in this literature are as exact as photographic and printing processes will allow. We strongly recommend that colours are judged and chosen from actual materials rather than photographic representation depicted herein. Although every effort is made to ensure consistency of product colour, variations between production batches can occur. We therefore recommend that, when purchasing materials, especially in the case of larger quantities, they all come from the same batch and that products are thoroughly mixed on site by drawing from a minimum of three packs.

Availability

Details of pack contents are listed for the guidance of stockists. Stockists are usually prepared to split full packs for sale in any quantity. Product dimensions and weight, etc. are nominal and subject to manufacturing tolerances.

*Patented Paving System

Priora is patented in UK and EP079168931.

Natural Stone

Silver Birch and Antique Silver Multi like all natural stone sandstone products vary with differing geological conditions. Such variations can lead to small particles of ironstone within the product creating a darkening of the surface with natural weathering. Being pale in colouration, this natural weathering is more obvious with Silver Birch and Antique Silver Multi as against the other natural stones in the Marshalls range.

Staining

Certain common garden chemicals such as Ferrous Sulphate can stain paving. Please check the information given on the container holding the chemical. If chemicals are spilt on the paving remove immediately by rinsing away with clean water.

Marshalls Commitment to Quality & Innovation

Marshalls is committed to innovative product development and manufacture. To help you obtain maximum enjoyment and long service from any Marshalls product, we would be pleased to make you aware of the following:

The evolution of new product design is continuous and information is subject to change without notice. Customers should check with the stockist to ensure that they have the latest details.

All Marshalls products are manufactured to the appropriate European Standard where applicable. Where products (or intended usage) lie outside the scope of a British (or European) Standard, Marshalls own standard will be employed. All products are supplied subject to Marshalls Standard Conditions of Sale, a copy of which is available on request. Liability in respect of any statements, conditions, warranties and representations made on behalf of the Company is limited in accordance with the terms set out in the Standard Conditions of Sale.

Health and Safety

Care should be taken when handling and installing Marshalls products. Guidelines on the Control Of Substances Hazardous to Health (COSHH) are available for all Marshalls products, either through our website, www.marshalls.co.uk/homeowners or from Marshalls Technical Advisory Service. Tel: 0370 411 2233.

Marshalls Register

Marshalls Register of installers are regularly inspected to ensure they comply with the membership agreement. Marshalls are not a party to the contract between the Registered installer and the customer. Marshalls cannot be held responsible for any installation undertaken by a Marshalls Register installer.

Register Installer

Details of membership are available from Marshalls Register support team on 0345 820 5000.

Hard Landscape Guarantee Conditions

Marshalls products are manufactured to the highest standards. The Hard Landscape Guarantee is only available for domestic projects installed by a Marshalls Register Installer where a guarantee has been purchased; the cost of the guarantee is £50 (+VAT) per £5000 of the installed value. The Hard Landscape Guarantee can only be issued by Marshalls upon receipt of a correctly completed Guarantee Request Form and the relevant fee. The Hard Landscape Guarantee covers Marshalls branded products for ten years and the workmanship of the installation undertaken by a Marshalls Register Installer for five years. This guarantee is offered as an additional benefit by Marshalls and in no way affects any parties' statutory rights.

The house owner is responsible for applications for any relevant planning permission. Marshalls do not accept liability for application of planning permission on any project covered by the Marshalls Hard Landscape Guarantee or otherwise.

In the unlikely event of products reaching you in less than satisfactory condition, you should notify the stockist immediately with details of the product and batch codes printed on the packaging. In addition to this, responsibility for costs incurred for uplifting and relaying defective products may be prejudiced if, upon reasonable inspection, the defect ought to have been apparent prior to laying.

Pendle, Leyburn, Textured Utility, Utility and Richmond pavings are intended to serve the 'budget' end of the market and as such should not be confused with premium products such as Heritage or Coach House. In addition to this, because of their limited protection in transit, there is a significant probability of pavings bearing scratch marks to the face. Due to local manufacturing, precise colours and face finishes may vary and it is recommended that pavings from different factories are not mixed on site. Pendle, Leyburn, Textured Utility, Utility and Richmond therefore fall outside the scope of The Hard Landscape Guarantee.

Order Select

When designing your garden or driveway there may be times when you do not need a full pack of product, for example when:

- Finishing an area of paving
- Creating a decorative border
- Adding to an existing project

Marshalls unique ‘Order Select’ service means that your Marshalls stockist can order less than full-pack quantities for most of the products in this brochure. You can ask your installer to use Order Select, or if you are doing the job yourself, ask your stockist to use the service.

How do I use the Order Select service?

- Check that the product you need has the Order Select Logo (✓)
- Carefully calculate the number of each item required, making an allowance for cutting the wastage, however, some may be mixed size packs and although you can order less than pack quantity, this will still be of mixed sizes but just less square metres than in a normal pack
- Give this to your local stockist who will place your order direct with Marshalls for delivery by express carrier
- A premium is charged for this service, so it may be more economical to adjust the amount to the nearest full pack – especially if you are considering extending the project at a later date. Please note: If ordering a product to extend an existing project, it is likely that batch numbers will be different and the colour may vary. Please note, on some Project Pack products there may be a limit on the number of single size flags available to order via Order Select. The maximum number will not exceed the amount of that single size contained in the Project Pack.
